---

## EDUCATION

**Bachelor of Science in Software Development**  
**Minor in Cyber Security**

Expected May 2026

Phoenix, AZ

*Grand Canyon University*

- GCU Tech Club
  - IEEE Club
- 

## EXPERIENCE

**Asset and Space Database Assistant**  
*Grand Canyon Education*

May 2024 – Present

Phoenix, AZ

- Used databases to locate and input assets
  - Streamlined preventive maintenance schedules
  - Communicate among teammates to complete projects
  - Maintain upkeep and troubleshoot facility applications
- 

## PROJECTS

**Lunara** | *React / TypeScript / Node.js / Express / MongoDB / Docker*

- Building a postpartum support platform with a React frontend and TypeScript backend.
- Integrated JWT and Google OAuth authentication with Passport.js.
- Containerized backend, database, and quality tools with Docker Compose.
- Applied Agile teamwork practices using GitHub Projects

**Blodged** | *Java / Spring Boot framework*

- Developed a blogging platform with RESTful APIs in Spring Boot.
- Designed relational schema in MySQL for authentication and posts.
- Secured endpoints with Spring Security and role-based access.
- Practiced GitHub collaboration and version control workflows.

**CineScope** | *C# / .net framework*

- Built a movie review platform with Blazor WebAssembly and ASP.NET Core.
  - Implemented CRUD operations for reviews with secure user accounts.
  - Integrated MongoDB for scalable storage of users and reviews.
  - Produced technical docs, wireframes, and admin/user training guides.
- 

## SKILLS
