EDUCATION

Bachelor of Science, Software Development

Expected May 2026

Grand Canyon University

- GCU Tech Club
- IEEE Club

Minor, Cyber Security

Grand Canyon University

WORK EXPERIENCE

Database Assistant

May 2024 – Present

Grand Canyon Education

- Managed asset tracking and data entry across organizational databases, **ensuring accurate records** for facility operations.
- Optimized maintenance scheduling workflows, **reducing downtime** and improving operational efficiency.
- **Collaborated cross-functionally** with team members to scope, prioritize, and deliver projects on deadline.
- Diagnosed and resolved issues in facility management applications, serving as first-line technical support.

PROJECTS

Lunara | React / TypeScript / Node.js / Express / MongoDB / Docker

- Developing a full-stack postpartum support platform with a React frontend and Node.js/Express API layer, both in TypeScript.
- **Implemented secure authentication** with JWT tokens and Google OAuth via Passport.js, supporting multiple login flows.
- **Architected a containerized development environment** using Docker Compose for the API, MongoDB, and linting/testing tools.
- Coordinated team deliverables through Agile sprints and kanban tracking in Github Projects.

ASideNote | React / TypeScript / Tailwind CSS / PostgreSQL

- Developed a visual note-taking application featuring an infinite canvas experience for organizing and managing notes intuitively
- Built a responsive frontend using React, Vite, TypeScript, and Tailwind CSS with a clean, minimal UI focused on usability
- Integrated the TipTap rich text editor to support flexible formatting and dynamic note editing capabilities
- Designed drag-and-drop note interactions and scalable architecture for future features such as cloud sync and PDF export

CineScope | C# / ASP.NET / Blazor WebAssembly / MongoDB

- Developed a single-page movie review application using Blazor WebAssembly with an **ASP.NET Core** backend
- Implemented full CRUD functionality for reviews, with account creation and session-based authentication
- Leveraged **MongoDB** for flexible document storage of user profiles and review data
- **Authored technical documentation** including system architecture diagrams, wireframes, and end-user guides

SKILLS

Languages: **TypeScript**, JavaScript, Java, C#, HTML/CSS

Frameworks: **React**, Next.js, Vue.js, Node.js/Express, Spring Boot, **ASP.NET**, Blazor

Databases: **MongoDB**, MySQL, PostgreSQL

Tools & Practices: Docker, Git, Postman, REST APIs, **JWT/OAuth**, Agile/Scrum, CI/CD
